

HARMAN KALER

+91 98724 03948 ✧ Jalandhar, Punjab, India - 144039
kalerharman105@gmail.com ✧ github.com/harmansingh004

OBJECTIVE

Application Developer with hands-on experience in building cross-platform applications and AI-integrated systems. Strong foundation in Data Structures, OOP, and backend development, seeking software development opportunities.

EDUCATION

Bachelor of Technology in Computer Science and Engineering 2022 – 2026
Guru Nanak Dev University Regional Campus, Jalandhar, Punjab, India
CGPA:7.28/10

SKILLS

Programming	Dart, Python, JavaScript
Frameworks	Flutter, FastAPI
Backend & Databases	Node.js, MongoDB, Supabase, REST APIs, JWT
Core CS	Data Structures & Algorithms, OOP, Operating Systems
Tools & UI/UX	Figma, Prototyping, Wireframing
Languages	Punjabi, Hindi, English

EXPERIENCE

Software Developer Intern Jan 2026 – Present
CDAC Mohali *(Punjab, India)*

- Contributed to the development of scalable software solutions in a collaborative research-driven environment.
- Designed and implemented application modules using modern frameworks, focusing on performance and maintainability.
- Developed and integrated REST API endpoints, improving data retrieval efficiency
- Participated in debugging, testing, and optimizing workflows to improve system reliability.
- Collaborated with cross-functional teams, gaining exposure to real-world software engineering practices.

PROJECTS

GRASP — AI Tutor Mobile Application

(Flutter, Dart, Node.js, MongoDB, JWT, Figma, Youtube API)

- Developed an AI-powered mobile learning platform that generates structured multi-chapter courses from a single topic using generative AI.
- Implementing dynamic content generation including quizzes, cheat sheets, and visual diagrams for personalized learning.

MedScan AR — Augmented Reality Medicine Scanner

(Flutter, Dart, Figma, ARCore, Computer Vision, REST APIs)

- Built a mobile application leveraging AR to scan medicine packaging and extract relevant medical information.
- Providing dosage details, usage instructions, and drug interaction warnings to enhance medication safety.
- Integrated location-based services to suggest nearby pharmacies for medicine availability.

Kairos — Productivity Tracker

(Flutter, Dart, Firebase)

- Developed a cross-platform productivity application with task scheduling, reminders, and analytics dashboards.
- Designed interactive progress tracking and visualization features to improve user engagement.
- Built a modular and scalable UI architecture using reusable components for consistent performance.

LEADERSHIP

Technical Lead, University Technical Communities

- Organized hackathons and workshops, mentoring 50+ students and Increased participation in technical events by 30% through structured initiatives and community engagement.
